

# Ultra soak up

## What you need

Plastic see-through beakers, water, samples of paper kitchen towels, dropping pipette, elastic bands.

Supermarkets sell many varieties of kitchen towels, all of which claim to be very absorbent. Design and carry out a fair test to see if their claims are true. The diagram below may help you.

I want to find out:

I need to keep these things the same:

1

2

3

The one thing I will change is:

Here are my results:

Kitchen towels					
Number of drops of water absorbed	A	B	C	D	E

**EXTRA!**  
Test the absorbency of kitchen cloths in the same way.
