

# Family day trip

A family of two adults and two children went to Brighton for the day.

- \* They spent £54 on train tickets. The children travelled at half price. How much were the adult tickets?

\_\_\_\_\_

- \* They spent £50 in a restaurant for lunch. How much was that each on average?

\_\_\_\_\_

- \* They bought a T-shirt each and an ice-cream for each of the children. It cost £42.50. How much were the T-shirts?

\_\_\_\_\_

- \* They took a taxi back to the station. It went 4.2 miles and cost £13.02. How much was that per mile?

\_\_\_\_\_

- \* How much did the whole day cost them? \_\_\_\_\_

- \* How much is this per person on average? \_\_\_\_\_

## Add-on

How much extra would it have cost if both children had taken a friend with them who bought the same things?
