

Plants

You need: 2 trays of soil, fertiliser and some young plants.

Read

Plants are living things and can do many of the things that animals do. Unlike animals, however, plants make their own food.

Absorb water and nutrients

Activity

Investigate whether fertilisers affect the growth of young plants. Grow some young plants in a tray containing normal soil and some in a tray containing soil mixed with fertiliser.

| Measure growth each week | At the start | After one week | After two weeks | After three weeks |
|---|--------------|----------------|-----------------|-------------------|
|  with fertiliser | | | | |
|  without fertiliser | | | | |
