NAME

From Start to Finish

The picture shows three paths from Start to Finish.

Also:

- Every number is on one path only.

- Each path contains a number from each row.

- The totals along the three paths are 13, 15 and 17, which have a difference of 2.

Can you find another path where the totals have a difference of 1?

Can you find a path where the totals are the same for each path?

What different ways can you find of making paths that have totals which are the same, have a difference of 1 or have a difference of 2?

Key Concept: *Patterns and algebra—addition*
