

NAME

Guess What's in My Mind

Did you know that people only half listen. A lot of the time they think they know what someone is going to say, so they cut them off or finish their sentences for them.

But can you read what is in people's minds?

You are going to ask four people whether they think school uniforms are a good idea, and tell you why or why not. Make sure you listen carefully and do not cut the speaker off. Before you do though, create a thought bubble for each of the people showing what you think they will say.
